

**SIERRA VALLEY SUBBASIN GROUNDWATER SUSTAINABILITY PLAN**  
**DRAFT TABLE OF CONTENTS**

---

**1.0 Introduction**

- 1.1 Purpose of the Groundwater Sustainability Plan (GSP or Plan)
- 1.2 Sustainability Goal
- 1.3 Agency Information (Reg. § 354.6)
  - 1.3.1 Organization and Management Structure of the Groundwater Sustainability Agency (GSA or Agency)
  - 1.3.2 Legal Authority of the GSA
  - 1.3.3 Estimated Cost of Implementing the GSP and the GSA’s Approach to Meet Costs
- 1.4 GSP Organization
  - 1.4.1 Description of how the GSP is organized
  - 1.4.2 Preparation Checklist for GSP Submittal

**2.0 Plan Area and Basin Setting**

- 2.1 Description of the Plan Area (Reg. § 354.8)
  - 2.1.1 Summary of Jurisdictional Areas and Other Features (*Reg. § 354.8 b*)
    - 2.1.1.1 Plan Area, Exclusive Agencies, and Adjacent Basins
    - 2.1.1.2 Adjudicated Areas, Other Agencies, and Areas Covered by Alternative
    - 2.1.1.3 Jurisdictional Boundaries
    - 2.1.1.4 Land Use and Water Sources
    - 2.1.1.5 Groundwater Well Density and Groundwater Dependent Communities
  - 2.1.2 Water Resources Monitoring and Management Programs (*Reg. § 354.8 c, d, e*)
    - 2.1.2.1 Existing Water Resources Monitoring Programs
    - 2.1.2.2 Existing Water Resources Management Programs
    - 2.1.2.3 Conjunctive Use Programs
    - 2.1.2.4 Incorporating Existing Water Resources Monitoring and Management Programs to the GSP
    - 2.1.2.5 Limits to Operational Flexibility from Existing Water Resources Monitoring and Management Programs
  - 2.1.3 Land Use Elements or Topic Categories of Applicable General Plans (*Reg. § 354.8 f*)
    - 2.1.3.1 Summary of General Plans and Other Land Use Plans
    - 2.1.3.2 Description of How Land Use Plan Implementation May Change Water Demands or Affect Achievement of Sustainability and How the GSP Addresses Those Effects
    - 2.1.3.3 Description of How Implementation of GSP May Affect the Water Supply Assumptions of Relevant Land Use Plans
    - 2.1.3.4 Summary of Processes for Permitting New or Replacement Wells in the SV Subbasin
    - 2.1.3.5 Information Regarding the Implementation of Land Use Plans Outside the SV Subbasin that could Affect the Ability of the GSAs to Achieve Sustainable
  - 2.1.4 Additional GSP Elements (*Reg. § 354.8 g*)
    - 2.1.4.1 Control of Saline Water Intrusion
    - 2.1.4.2 Wellhead Protection
    - 2.1.4.3 Migration of Contaminated Groundwater
    - 2.1.4.4 Well Abandonment and Well Destruction Program

- 2.1.4.5 Replenishment of Groundwater Extraction
- 2.1.4.6 Conjunctive Use Programs and Underground Storage
- 2.1.4.7 Well Construction Policies
- 2.1.4.8 Groundwater Contamination Cleanup, Recharge, Diversions to Storage, Conservation, Water Recycling, Conveyance, and Extraction Projects
- 2.1.4.9 Efficient Water Management Practices
- 2.1.4.10 Relationships with State and Federal Regulatory Agencies
- 2.1.4.11 Land Use Plans and Efforts to Coordinate with Land Use Planning Agencies to Assess Activities that Potentially Create Risks to Groundwater Quality or Quantity
- 2.1.4.12 Impacts on Groundwater Dependent Ecosystems
- 2.1.5 Notice and Communication (*Reg. § 354.10*)
  - 2.1.5.1 Beneficial Uses and Users
  - 2.1.5.2 Decision-Making Processes
  - 2.1.5.3 Public Engagement Opportunities
  - 2.1.5.4 Encouraging Active Involvement
  - 2.1.5.5 Informing the Public on GSP Implementation Progress
- 2.2 Basin Setting**
  - 2.2.1 Hydrogeologic Conceptual Model (*Reg. § 354.14*)
    - 2.2.1.1 Physiography
    - 2.2.1.2 Climate
    - 2.2.1.3 Vegetation and Land Use
    - 2.2.1.4 Soils
    - 2.2.1.5 Geology
    - 2.2.1.6 Hydrogeologic Framework
  - 2.2.2 Current and Historical Groundwater Conditions (*Reg. § 354.16*)
    - 2.2.2.1 Groundwater elevation data
    - 2.2.2.2 Estimate of groundwater storage
    - 2.2.2.3 Seawater intrusion conditions
    - 2.2.2.4 Groundwater quality issues
    - 2.2.2.5 Land subsidence conditions
    - 2.2.2.6 Identification of interconnected surface water systems
    - 2.2.2.7 Identification of groundwater-dependent ecosystems
  - 2.2.3 Water Budget Information (*Reg. § 354.18*)
  - 2.2.4 Management Areas (as Applicable) (*Reg. § 354.20*)
- 2.3 References**
- 3.0 Sustainable Management Criteria**
  - 3.1 Introduction to Sustainable Management Criteria and Definition of Terms**
  - 3.2 Sustainability Goal (Reg. § 354.24)**
  - 3.3 Monitoring Networks (Reg. § 354.26)**
    - 3.3.1 Groundwater Quality Monitoring Network
      - 3.3.1.1 Description of Groundwater Quality Network ((Reg. § 354.34)
      - 3.3.1.2 Assessment and Improvement of Monitoring Network

3.3.1.3 Monitoring Protocols for Data Collection and Monitoring (Reg. § 352.2)

3.3.2 Subsidence Monitoring Network

3.3.2.1 Description of Monitoring Network for Land Subsidence Sustainability Indicator (Reg. § 354.34)

**3.4 Sustainable Management Criteria**

3.4.1 Groundwater Elevation

3.4.1.1 Undesirable Results

3.4.1.2 Effects on Beneficial Uses and Users

3.4.1.3 Relationship to Other Sustainability Indicators

3.4.1.4 Information and Methodology Used to Establish Minimum Thresholds and Measurable Objectives

3.4.1.5 Measurable Objectives

3.4.1.6 Path to Achieve Measurable Objectives

3.4.2 Groundwater Storage

3.4.3 Depletion of Interconnected Surface Waters

3.4.4 Degraded Groundwater Quality

3.4.4.1 Undesirable Results

3.4.4.2 Effects on Beneficial Uses and Users

3.4.4.3 Relationship to Other Sustainability Indicators

3.4.4.4 Information and Methodology Used to Establish Maximum Thresholds and Measurable Objectives

3.4.4.5 Maximum Thresholds

3.4.4.6 Measurable Objectives

3.4.4.7 Path to Achieve Measurable Objectives

3.4.5 Land Subsidence

3.4.5.1 Undesirable Results (Reg. § 354.26)

3.4.5.2 Effects on Beneficial Uses and Users

3.4.5.3 Relationship to Other Sustainability Indicators

3.4.5.4 Information and Methodology Used to Establish Minimum Thresholds and Measurable Objectives (Reg. § 354.30)

3.4.5.5 Minimum Thresholds (Reg. § 354.28)

3.4.5.6 Measurable Objectives

3.4.5.7 Path to Achieve Measurable Objectives

**3.5 References**

**4.0 Projects and Management Actions to Achieve Sustainability Goal (Reg. § 354.44)**

**4.1 Project #1 Description**

- Measureable objective that is expected to benefit from the project or management action
- Circumstances for implementation
- Public noticing
- Overdraft mitigation projects and management actions
- Permitting and regulatory process
- Time-table for initiation and completion, and the accrual of expected benefits

- Expected benefits and how they will be evaluated
- How the project or management action will be accomplished. If the projects or management actions rely on water from outside the jurisdiction of the Agency, an explanation of the source and reliability of that water shall be included.
- Legal authority required
- Estimated costs for the projects and managements and plans to meet those costs (economic analysis and finance strategy for projects and management actions)
- Management of groundwater extractions and recharge
- Relationship to additional GSP elements as described in Water Code §10727.4.

4.2 Project #2 Description

4.3 Project #X Description

**5.0 Plan Implementation**

5.1 Estimate of GSP Implementation Costs (*Reg. § 354.6*)

5.2 Schedule for Implementation

5.3 Annual Reporting

- GSA’s plan for required annual reporting

5.4 Periodic Evaluations

- GSA’s process for required periodic evaluations
